

Ultrasonic Cool Mist Humidifier with Adjustable Output

This ultrasonic humidifier increases humidity through a fine, cool mist. It features adjustable mist output, a transparent water tank, and auto shut-off.

Overview

Ultrasonic Cool Mist Technology

This Ultrasonic Cool Mist Humidifier is designed to efficiently increase humidity levels in indoor environments using advanced misting technology. It features a generous 6L capacity and adjustable mist output to suit various room sizes and personal comfort preferences. With built-in safety mechanisms like automatic shut-off when the water runs out, it offers reliable and quiet performance for bedrooms or office spaces.
