

Ultrasonic Cool Mist Humidifier with Essential Oil Diffuser

This humidifier utilizes ultrasonic technology to generate a cool mist, effectively increasing humidity levels. It features a water bottle reservoir, a compact base unit with a translucent blue water level indicator, and a removable cap for essential oil diffusion.

Product Overview

Ultrasonic Cool Mist Humidifier

This ultrasonic cool mist humidifier is designed to efficiently increase humidity levels in your environment while operating quietly. Featuring a user-friendly design with a water bottle reservoir and a translucent blue level indicator, it is ideal for maintaining air quality in bedrooms, offices, and nurseries. Additionally, the unit includes a removable cap that allows for essential oil diffusion, providing a versatile solution for comfort and relaxation.
