

Ultrasonic Cool Mist Tabletop Humidifier

This ultrasonic cool mist humidifier features a unique tulip-shaped design with floral accents. It uses ultrasonic technology to generate a fine mist, adding moisture to the air and helping to alleviate dryness.

Product Overview

Ultrasonic Cool Mist Technology

This ultrasonic cool mist humidifier is designed to efficiently add moisture to the air, helping to alleviate dryness in small to medium-sized rooms. Featuring a unique, modern tulip-shaped design with a split top and floral accents, it serves as both a functional appliance and a stylish tabletop accessory. The unit includes a convenient control knob for precise mist output adjustment and an integrated filter cartridge for enhanced water purification.
