

Ultrasonic Immersion Cleaning Rod

This ultrasonic cleaning rod is designed for immersion in cleaning solutions. It uses ultrasonic vibrations to clean and sterilize items within openings and crevices.

Product Overview

Ultrasonic Immersion Cleaning Technology

The Ultrasonic Immersion Cleaning Rod provides a portable, professional-grade solution for targeted stain removal. By leveraging high-frequency ultrasonic vibrations, the device creates millions of cavitation bubbles that strip away stubborn contaminants like food, lipstick, and coffee stains while simultaneously neutralizing bacteria. Its compact, ergonomic form factor is designed for convenience, making it an essential tool for rapid and effective surface sanitation.

Technical Specifications

Cleaning Technology	Ultrasonic Cavitation, Emulsification, Liquid Immersion
Power Requirements	4 x AAA batteries

Key Features

Target Contaminants

- Food residues
- Lipstick stains
- Coffee stains
- Bacteria and Viruses

Design & Ergonomics

Portable • Ergonomic • Compact • Immersion-ready
