

# Ultrasonic Liquid Flowmeter

This ultrasonic flowmeter is designed for measuring fluid flow within large pipelines, typically ranging from 2 to 240 inches. It is available in handheld, wall-mounted, and fixed configurations for versatile use.

## ADDITIONAL IMAGES

## Overview

### Precision Liquid Flow Measurement

This advanced ultrasonic flowmeter is engineered for accurate non-invasive fluid measurement across a vast range of pipe sizes. Ideal for large-scale industrial infrastructure, it supports both handheld and fixed installation configurations to suit diverse operational requirements. The device provides real-time monitoring of volume, flow rate, and velocity to ensure precise process control in water treatment, HVAC, and chemical processing environments.

## Technical Capabilities

### Supported Pipe Diameter Range

**50 mm**

Minimum Diameter

**6000 mm**

Maximum Diameter

### Measured Flow Metrics

Cubic meters per hour (m<sup>3</sup>/h), Velocity (m/s)

## Installation & Design

### Mounting Configurations

- Handheld
- Fixed
- Wall-mounted
- Portable
