

Ultrasonic Skin Scrubber and Serum Infuser

This dual-function device uses ultrasonic vibrations for deep pore cleansing and enhanced serum absorption. It features multiple intensity levels and a stainless steel spatula for hygienic use.

Product Overview

Dual-Function Professional Skincare Tool

The Ultrasonic Pore Extractor and Serum Infuser is a professional-grade device designed for deep pore cleansing and optimized skincare absorption. By utilizing targeted ultrasonic vibrations, it effectively removes blackheads and impurities while simultaneously enhancing the penetration of serums. Its ergonomic design, combined with a hypoallergenic stainless steel spatula, ensures a comfortable and hygienic experience for all users.

Technical Specifications

Operating Modes	Deep Pore Extraction, Serum Infusion
