Product Overview

Modern design integrated into home environment

Advanced Ultrasonic Climate Control

The CF-2758 ultrasonic humidifier provides a versatile solution for maintaining optimal indoor air quality. Equipped with both warm and cool mist capabilities, it helps alleviate discomfort from dry air throughout the year. Its intelligent sensor system automatically monitors and adjusts humidity output to ensure a comfortable environment without constant manual intervention.

Technical Specifications

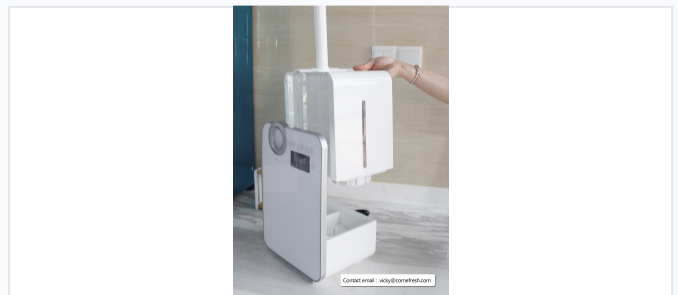

Easy-access large opening water cover

Water Tank Capacity	5 L
Continuous Run Time	12 hours
Mist Intensity Settings	3

Features & Benefits

Dual mist nozzle design for even distribution

Top-loading water tank for convenient refilling and cleaning

Key Features

- Automatic Humidity Sensor
- Dual mist nozzle with extension tube
- Top-fill design for easy cleaning
- Automatic safety shut-off
- Digital control display

Mist Modes	Warm Mist, Cool Mist
