

Ultraviolet Air Sterilizer with 360-Degree Sterilization

This ultraviolet air sterilizer uses a UV-C lamp to eliminate airborne pathogens. It features a protective cage and allows for 360-degree sterilization.

Product Overview

Professional Grade Air Sterilization

The ultraviolet air sterilizer provides comprehensive 360-degree air disinfection by utilizing deep UV-C light at 254nm. This high-energy output effectively penetrates and destroys the DNA of a broad spectrum of pathogens, including various viruses and bacteria. Designed for versatility and durability, the unit is suitable for high-traffic environments such as hospitals, schools, and offices.

Technical Specifications

UV Wavelength	254 nm
Sterilization Coverage	360-degree

Key Features

Design Features

- Protective safety cage
- Durable industrial construction
- High power energy UV-C lamp
- Low maintenance requirements

Effective Against	Coronaviruses, Influenza Viruses, E. coli, Hepatitis B, Mites, Dysentery Bacteria
-------------------	---

Application

Recommended Settings

Hospitals • Schools • Offices • Residential
