

Underbone Motorcycle

This motorcycle features a step-through frame design, commonly known as an underbone or cub bike. It is equipped with a single-cylinder engine and practical features for urban commuting.

Overview

Urban Commuting Solution

This underbone motorcycle features a practical step-through frame design optimized for efficient urban commuting. Engineered for reliability and economy, it is equipped with a responsive single-cylinder engine and a robust suspension system. The inclusion of a rear carrier and standard safety features makes it a versatile choice for daily transport needs.
