Overview

ZTCY-1A Underground Loader

The ZTCY-1A is a robust and reliable underground mining loader engineered for high productivity in confined spaces. Its compact articulated design ensures excellent maneuverability within narrow tunnels, while the heavy-duty hydraulic system provides superior breakout force. Designed for minimal downtime and operator comfort, this loader is an essential tool for demanding mining environments.

Performance

Key Performance Indicators

1 ZTCY

Model Series

Key Features

Operational Advantages

- Articulated steering for narrow tunnel maneuverability
- High breakout force for efficient material handling
- Spacious operator cabin for enhanced comfort and visibility
- Heavy-duty tires with chain protection options

Safety Systems

Reinforced Cabin, Integrated Safety Systems, Warning Signs, Protective Structures

Technical Specifications

System Components

Component	Status
Hydraulic System	Heavy-Duty
Steering Type	Articulated
Frame Construction	Reinforced
