Product Overview

High-Efficiency Underground Mining System

This comprehensive mining suite features the world's largest shearer, capable of a 9m mining height, complemented by high-performance road headers and belt conveyors. Engineered for reliability and operational scale, these systems have been successfully exported to multiple international markets including Russia, Ukraine, Turkey, Australia, and Vietnam. Designed to maximize production efficiency, the machinery holds a significant domestic market share in each respective category.

Technical Performance

Maximum Mining Height	9 m
-----------------------	-----

Market Reach

Market Share Distribution

Equipment Type	Domestic Market Share
Shearer	30%
Road Header	20%
Belt Conveyor	30%

Export Destinations	Russia, Ukraine, Turkey, Australia, Vietnam
