Product Overview

All-in-One Instant Water Solution

This undersink water purification system provides a versatile, all-in-one solution for your kitchen, delivering hot, cold, chilled, and sparkling water from a single tap. Designed for efficiency and space-saving, it incorporates rapid 3-second heating technology and a powerful compressor-based refrigeration system. The unit is built with high-safety standards, including a 0-silicone waterway design and double pressure relief for secure, long-term operation.

Technical Specifications

Advanced cooling and heating features ensure optimal water quality and temperature management.

Electrical Requirements

220 V

Voltage

50 Hz

Frequency

2200 W

Rated Power

System Performance

Feature	Specification
Heating Power	2000W
Working Pressure	0.4~0.6MPa
Cold Water Capacity	3.0 L/H (<10°C)
Sparkling Concentration	e1g/100ml (4°C)

System Capacities

Water Tank Capacities

- Hot water tank: 1.6L
- Chilled water tank: 1.2L
- Carbonated water tank: 0.8L
- Continuous cold water output: 2000mL

System Construction

Safety Features	0-Silicone Waterway, Double Pressure Relief, R600a Refrigerant, ABS+Metal Construction
Product Dimensions	400 x 170 x 400 mm
