

# Underwater Video Camera System with LCD Monitor

This underwater video system is designed for capturing high-quality video in aquatic environments. It features a rugged, waterproof camera unit connected to a portable control box with a built-in LCD screen for real-time monitoring and recording.

## Product Overview

### Professional Underwater Inspection System

This advanced underwater video system is engineered for high-quality aquatic environment monitoring and recording. Featuring a rugged, waterproof camera unit and a portable control station with a built-in LCD monitor, it provides clear real-time visibility. Integrated lighting ensures performance in low-light conditions, while the included carrying case guarantees portability and safety for field operations.

## Technical Specifications

### Included Components

- Underwater Camera Unit
- Portable Control Box
- LCD Monitor
- Durable Carrying Case

### Key Features

Waterproof, Rugged Design, Built-in Monitor, Low-light Ready

## Connectivity

### Ports and Interfaces

- Video Input (VIDEO IN)
- Video Output (VIDEO OUT)
- Camera Connection (CAM)
