

Unfinished Fiberboard Sheet

This high-density fiberboard is ideal for industrial and crafting applications. Its consistent thickness and smooth surface ensure reliable performance.

Product Overview

Unfinished Fiberboard Sheets

These high-density raw fiberboard sheets are designed to serve as a versatile, reliable base for a wide variety of industrial and crafting applications. Featuring a consistent thickness and a smooth surface, they are ideal for further processing, including painting, laminating, or precision machining. Their durability makes them an excellent choice for components in furniture manufacturing, apparel and textile machinery, and high-quality packaging solutions.

Technical Specifications

Surface Finish

Unfinished • Smooth

Density Classification

High-density

Applications

Common Industrial Applications

- Furniture manufacturing
- Apparel and textile machinery components
- Industrial packaging solutions
- Custom crafting and fabrication

Processing Capabilities

Processing Compatibility

Paintable, Laminatable, Processable
