

# Uninterruptible Power Supply 0.5-5000VA

This uninterruptible power supply (UPS) offers reliable backup power and voltage regulation for sensitive electronic equipment. It is available in capacities ranging from 0.5 to 5000VA and features power conditioning, surge protection, and battery management.

## Overview

### Professional Power Protection

This high-performance uninterruptible power supply series provides reliable backup power and voltage regulation for sensitive electronic equipment. Designed to ensure business continuity, these units safeguard critical infrastructure against power outages, surges, and fluctuations. Featuring an integrated LCD interface, the system allows for precise real-time monitoring of power parameters and UPS status.

## Technical Specifications

### Capacity Range

<b>0.5 VA</b> Minimum Capacity	<b>5000 VA</b> Maximum Capacity
-----------------------------------	------------------------------------

### Key Features

Voltage Regulation, Surge Protection, Battery Management, LCD Monitoring, Power Conditioning

## Applications

### Suitable Applications

- Computer Workstations
- Enterprise Servers
- Networking Hardware
- Critical Electronic Loads

## Features

### System Benefits

Data Protection • Extended Runtime • Business Continuity
