

# Uninterruptible Power Supply (UPS) System

This uninterruptible power supply (UPS) system provides reliable backup power to protect sensitive electronic equipment from power disturbances. It ensures continuous operation, preventing data loss and equipment damage in IT, industrial, and commercial environments.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Power Protection

The KR11 Plus Series is a high-performance uninterruptible power supply (UPS) system designed to provide reliable backup power and protect sensitive electronic equipment from power outages, voltage fluctuations, and surges. Featuring advanced technology, it ensures stable and clean power delivery to critical devices like servers, networking equipment, and computer systems. With built-in ECO mode for energy efficiency and comprehensive monitoring capabilities, this system offers a cost-effective solution for ensuring business continuity.

## Technical Features

### Suitable Applications

- Computer Systems
- Networking Equipment
- Servers
- Critical Electronic Devices
- Industrial Environments

### Key Features

Automatic Voltage Regulation (AVR), Surge Protection, Battery Management, ECO Mode, LCD Monitoring Display

## Performance Metrics

### Operational Metrics

**220 Vac**

Standard Output Voltage

**50 Hz**

Frequency

### Monitoring Parameters

- Input Voltage
- Output Voltage
- Internal Temperature
- Battery Level
- Power Status
