

Uninterruptible Power Supply (UPS) Unit

This uninterruptible power supply (UPS) unit provides backup power to ensure continuous operation of electronic devices during power outages. It features a compact design with indicator lights for monitoring power supply status.

Overview

Reliable Backup Power Solution

This uninterruptible power supply (UPS) unit is designed to provide seamless backup power during outages, ensuring the continuous operation of critical electronic equipment and peripherals. Housed in a durable, compact metal enclosure, it features efficient side ventilation to maintain optimal operating temperatures. With integrated indicator lights and user-friendly front panel controls, this unit is an essential tool for maintaining stable power in professional environments.

Technical Specifications

Primary Applications

- Desktop Computers
- IT Peripherals
- Sensitive Electronic Equipment

Housing Material	Metal
Design Features	Compact Design, Side Ventilation, LED Indicators, Front Control Panel
