

Uninterruptible Power Supply (UPS) Unit

This compact uninterruptible power supply (UPS) unit provides backup power during power outages. It features a ventilated enclosure and sturdy construction for office or server room environments.

Product Overview

Professional Power Protection

This uninterruptible power supply unit provides reliable backup power designed for critical office and server room environments. Its robust construction ensures long-term durability, while the integrated ventilation system optimizes thermal management for continuous operation. The unit is engineered for mobility, featuring a compact footprint that allows for seamless deployment in professional workspaces.

Application Environment	Office, Server Room, Data Backup
-------------------------	----------------------------------

Technical Features

Mobility	Yes
Thermal Design	Ventilated enclosure for heat dissipation
