

Uninterruptible Power Supply with Status Indicators

This uninterruptible power supply provides backup power during outages. It includes indicator lights and ventilation slots.

Overview

Reliable Power Protection

The U051 Uninterruptible Power Supply is a compact solution engineered to protect sensitive electronic equipment from power outages and voltage fluctuations. Designed for consistent reliability, it ensures seamless transitions to battery power during brief interruptions. Its integrated status indicator system allows for quick monitoring of power health and system readiness.

Technical Specifications

User Interface

- Status indicator lights
- Dedicated power button

Model Identifier

U051

Thermal Design

Integrated ventilation slots

Primary Application

Sensitive electronics, Data protection, Power backup
