

Uninterruptible Power Supply with Surge Protection

This uninterruptible power supply (UPS) provides backup power to ensure the continuous operation of connected devices during power outages. It also features surge protection to safeguard equipment from voltage spikes and fluctuations.

Product Overview

Reliable Power Protection

This uninterruptible power supply (UPS) provides essential backup power to ensure continuous operation of your mission-critical devices during unexpected outages. Integrated surge protection technology safeguards sensitive hardware from voltage spikes and dangerous electrical fluctuations. Designed for reliability, it is the ideal solution for protecting computers, networking equipment, and sensitive electronics from data loss and hardware damage.

Technical Specifications

Key Features

- Emergency power backup
- Voltage spike protection
- Surge suppression
- Data loss prevention

Model

UPS-1000

Application

Suitable Applications

Desktop Computers, Networking Equipment, Sensitive Electronics
