

Uninterruptible Power Supply with Surge Protection

This uninterruptible power supply provides backup power during outages. It has multiple outlets and surge protection to safeguard electronics from power fluctuations, ensuring continuous operation.

Product Overview

Reliable Power Protection

This compact Uninterruptible Power Supply is engineered to safeguard sensitive electronic equipment during power outages and fluctuations. By providing consistent battery backup and robust surge protection, it ensures your critical devices remain operational and protected from potential data loss or hardware damage. Designed for professional environments, it is an essential solution for maintaining uptime for computers and networking hardware.

Technical Specifications

Key Capabilities

- Integrated battery backup for power outage support
- Advanced surge protection to prevent equipment damage
- Compact design for space-efficient installation
- Multiple outlets for connecting critical devices

Recommended Applications

Computing Hardware, Networking Equipment, Sensitive Electronics, Critical Data Infrastructure
