

# Uninterruptible Power Supply with Surge Protection

This electrical apparatus provides emergency power to a load when the input power source fails. It supplies energy stored in batteries and provides near-instantaneous protection from input power interruptions.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade UPS Solution

This uninterruptible power supply system is designed to safeguard critical computer equipment and sensitive electronics from power irregularities. It provides a seamless transition to battery power within 10 milliseconds during outages, ensuring data integrity and continuous operation. With integrated surge protection and voltage regulation, it offers comprehensive defense against short circuits, overvoltage, and electrical noise.

## Performance Specifications

### Power Ratings

- 300W
- 600W

### Technical Metrics

**220 VAC**

Output Voltage

**50 Hz**

Frequency

Efficiency	80 %
Converting Time	10 ms

## Electrical Input

AC Input Range	150-270V
Generator Compatible	Yes

## Features and Protection

### Connectivity Options

- Two network connect ports
- USB port
- Fax/Modem port

### Protection Features

Overload, Short Circuit, Low Battery, Surge Protection, High-Frequency Filter

### Battery System

Sealed maintenance-free battery with auto-charge
