

Uninterruptible Power System UPS

This uninterruptible power system provides stable AC power, ensuring high efficiency. In the event of a power failure, the battery-powered inverter activates within 10ms.

Product Overview

Reliable Power Protection

This uninterruptible power supply (UPS) series is engineered to provide efficient and reliable power protection for microcomputer systems and sensitive electronic instruments. Featuring a compact and aesthetically pleasing design, it ensures stable AC output while protecting against voltage fluctuations, power failures, or extreme voltage levels. With a swift 10ms transition time, it effectively safeguards your equipment and data from unexpected downtime.

Performance Specifications

Output Waveform	Square wave
Transition Time	10 ms
Recharge Time	8h for 90% capacity

Protection Features

Surge Protection	320J (2ms)
Safety Mechanisms	Overload Protection, Battery Discharge Protection, Short-circuit Protection, Fault Indication

Model Comparison

Capacity and Weight Overview

Capacity (VA)	Power (W)	Net Weight (kg)
500M	210W	4
500	300W	7
1000	600W	15.6
1500	900W	20
