Product Overview

Unipolar Distribution Block

The UKK series unipolar distribution block is a space-saving electrical component designed for efficient power distribution in industrial and commercial panels. Featuring a robust construction with a transparent blue hinged cover, it allows for easy visual inspection and protection of the internal copper nickel-plated conductors. The unit is designed for fast and convenient DIN rail mounting, making it an ideal solution for organized wiring in demanding electrical environments.

Technical Specifications

Performance Ratings

690 V

Rated Voltage

160 A

Rated Current

Standards Compliance

IEC 60947-7-1, CE

Mechanical Dimensions

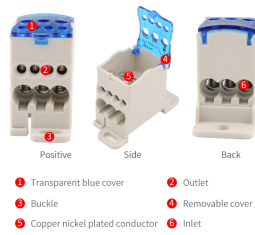

UKK160A

Size (L x W x H)

74mm x 28mm x 48mm

Design Features

Key Features

- Transparent blue hinged cover for easy inspection
- Copper nickel-plated conductors
- Buckle design for DIN rail mounting
- Compact space-saving profile
