

Universal Battery Charger

This is a universal battery charger suitable for charging various types of rechargeable batteries. It has adjustable contacts to accommodate different battery sizes and an LED indicator for charging status.

Overview

Versatile Charging Solution

The Universal Battery Charger is designed to provide a flexible and reliable power solution for a wide variety of rechargeable batteries. Featuring adjustable charging contacts, it easily accommodates different battery sizes, making it an essential tool for diverse applications. Its compact design ensures excellent portability, while the built-in LED indicator provides clear, real-time feedback on charging status.

Technical Specifications

Input Voltage

100 V
Min Input

240 V
Max Input

Output Voltage

4.2 V

Charging Current

500 mA

Features

Key Features

- Adjustable contacts for various battery sizes
- LED charging status indicator
- Compact and portable design
- Universal compatibility
