

Universal Battery Charger with LED Indicators

This battery charger is designed to meet diverse charging needs. It features multiple charging levels indicated by LED indicators and selectable current settings for different battery types, with universal input voltage and robust construction.

Overview

Universal Battery Charger

This universal battery charger is engineered to meet diverse charging requirements with precision and reliability. Designed for worldwide compatibility, it features selectable current settings and clear LED indicators to monitor charging levels. Its robust construction ensures durability, making it an ideal choice for professional charging applications.

Technical Specifications

Rated Input Voltage	200-240V
Input Frequency	50/60Hz
Rated Output Voltage	12 V
Rated Output Current	7 A

Features

Charging Status Indicators

25 % Charge Level	50 % Charge Level	75 % Charge Level	100 % Charge Level
-----------------------------	-----------------------------	-----------------------------	------------------------------

Design Highlights

Robust Construction, Worldwide Input Compatibility, LED Indicators, Selectable Current Settings
