Product Overview

High-Performance Air Intake Enhancement

This universal modified car air filter is engineered to optimize engine efficiency through an advanced multi-layer filtration system. Constructed from premium aluminum wire, high-quality cotton gauze, and eco-friendly polyurethane, it effectively captures contaminants while maximizing airflow. The washable design ensures a long service life, making it a sustainable and cost-effective upgrade for performance-oriented vehicles.

Technical Specifications

Maintenance

Washable • Reusable

Build Materials

Aluminum Wire, Cotton Gauze, Polyurethane
