

# Universal Milk Separator Motor

This universal motor is designed for milk separators. It features a high-speed armature with copper windings, a robust commutator, and durable carbon brushes for extended operational life.

## Product Overview

### Universal Milk Separator Motor

This high-performance universal motor is specifically engineered for milk separator applications. It features a robust design with a high-speed armature, durable carbon brushes, and integrated cooling vents to ensure reliable operation during continuous use. The compact, insulated housing and color-coded wiring facilitate easy installation and maintenance across various separator models.

## Technical Specifications

Motor Type	Universal Motor
Speed Control	Variable Speed
Certifications	CE

## Construction & Design

### Key Construction Features

- High-speed armature with copper windings
- Robust commutator
- Durable carbon brushes
- Insulated plastic housing
- Integrated cooling vents

Installation	Color-coded wiring for easy installation and maintenance
