

# Universal Motor for Commercial Blenders and Mixers

This universal motor is designed for commercial blenders, mixers, and juicers. The motor features a robust stator, wound rotor with commutator, and durable construction for efficient power conversion and reliable operation.

## Product Overview

### Versatile Universal Motor for Food Processing

This high-performance AC/DC universal motor is engineered for reliability in demanding commercial kitchen environments. Designed specifically for appliances like blenders, mixers, juicers, and meat grinders, it offers flexible power configurations to suit various operational needs. With customizable insulation classes and integrated safety features, it provides a robust solution for food processing equipment.

## Electrical Specifications

Voltage Range	110V - 240V
Frequency	50/60Hz
Insulation Class	Class B, Class E, Class F, Class H

## Performance & Safety

### Protection Features

Thermal Fuse • Reset Function Available

### Customization Options

- Custom Power (Watts)
- Custom Speed (RPM)

## Applications

### Compatible Appliances

- Commercial Blenders
- Mixers
- Juicers
- Meat Grinders
- Food Processors
- Choppers
