Product Overview

Universal Power Solution

This single-gang universal socket is engineered for versatile power connectivity in both residential and commercial environments. It features high-quality silver alloy contacts for superior arc resistance and a robust phosphor bronze internal structure that ensures lasting elasticity and conductivity. Designed for durability, the mechanism supports over 40,000 on-off operations, making it a reliable choice for high-traffic installations.

Technical Specifications

On-Off Operations

40000 cycles
Operations

Contact Material	Silver Alloy
Socket Internal Material	Phosphor Bronze
