Product Overview

Durable PVC construction designed for outdoor weather resistance.

Universal design suitable for a wide range of outdoor air conditioning units.

Universal PVC Air Conditioner Bracket

This universal PVC bracket is designed to provide a secure, stable, and cost-effective mounting solution for outdoor air conditioner units. Engineered for easy installation, the bracket includes integrated rubber dampers to effectively minimize vibration and operational noise. Its durable construction ensures reliable support for various AC models, making it an ideal choice for professional HVAC maintenance and installation projects.

Key Features

Engineered for high load-bearing capacity and stable performance.

Key Features

- High-quality, durable PVC material
- Includes rubber dampers for noise reduction
- Universal design compatible with multiple AC models
- Economical and practical installation solution
