

Universal Remote Control for Set-Top Boxes and TVs

This universal remote operates both set-top boxes and TVs. It features large, clearly labeled buttons for easy navigation.

Overview

User-Friendly 2-in-1 Control Solution

The URC54001A is a versatile universal remote control designed to operate both Set-Top Boxes and Televisions simultaneously. Featuring an ergonomic design with oversized, easy-to-press buttons, it is specifically engineered for accessibility in high-traffic environments like hospitals and hotels. Its simplified setup process eliminates the need for complex code entry, making it an ideal choice for elderly users or those seeking a streamlined entertainment experience.

Key Features
