

Universal Remote Control with Membrane Keypad

This universal remote control is equipped with a membrane keypad. It supports functions such as power, playback control, menu navigation, channel selection, and volume adjustment.

Product Overview

Universal Remote Control for Professional Use

This universal remote control features a durable PET surface, making it waterproof, easy to clean, and antiviral. Designed specifically for high-traffic environments like hotels and hospitals, it includes security features such as a code lock to prevent accidental operation and a battery cover lock. With one-touch setup and broad compatibility, it is an ideal solution for facility management.
