Product Overview

High-Performance Universal Grinder

This high-speed universal grinder is engineered for the efficient processing of various dry materials, including grains, herbs, spices, and chemical substances. Constructed from durable stainless steel, it ensures high hygiene standards suitable for both small-scale production environments and laboratory settings. With adjustable grinding times and a powerful motor, it provides consistent results tailored to your specific fineness requirements.

Technical Specifications

Capacity

100 g

Minimum Capacity

400 g

Maximum Capacity

Material

Stainless Steel

Features & Safety

Suitable Materials

- Grains
- Herbs
- Spices
- Chemical Materials

Ideal Use Cases

Small-scale Production • Laboratory Use • Flour Milling

Safety Mechanisms

Overload Protection, Secure Locking Mechanism
