

# Universal Tool and Cutter Grinder

This universal tool grinder is designed for precise grinding of various tools and cutters. It features adjustable axes and high-speed grinding wheels for accurate material removal.

## Product Overview

Universal tool and cutter grinder setup for high-precision operations.

## Versatile Precision Grinding

This universal tool and cutter grinder is a professional-grade machine engineered for precision sharpening and reconditioning. Featuring high-toughness FC30 iron construction, it ensures long-term machining accuracy and stability. Its flexible design supports a wide range of grinding operations, including inner bore, excircle, cylinder, and various cutting tool profiles.

## Technical Specifications

### Key Machine Dimensions

**250 mm**

Max Grinding Diameter

**350 mm**

Worktable Diameter

**150 mm**

Worktable Travel

**150 mm**

Wheel Head Lift

<b>Model</b>	PG-6025
<b>Wheel Head Rotation</b>	360 °

## Features & Capabilities

### Supported Optional Attachments

- 50E: For Morse 4# taper spiral milling and R-type lathe tools
- 50K: For drill bits (E3-E2) tapping heads (PG3-PG32)
- 50J and 50B models

<b>Grinding Scope</b>	Inner Bore, Excircle, Cylinder, Groove, Taper, Milling Cutter, Gear Hobber
