

Universal Tool and Cutter Grinder

This universal tool and cutter grinder is capable of grinding many kinds of cutters, such as tipped tools, boring cutters and plough cutters. It is designed for sharpening blades and lathe tools.

Product Overview

Precision Tool Grinding Solution

This universal tool and cutter grinder is designed for efficient sharpening of various cutting tools, including welding blades, boring tools, and planer tools. It offers high precision and simple operation, making it an ideal choice for replacing manual grinding methods. The machine supports a wide variety of tool geometries to ensure consistent performance in workshop environments.

Capabilities

Compatible Tool Types

- Welding blades
- Boring cutters
- Plough cutters
- Turning tools
- Milling cutting tools

Grinding Features

Precision Grinding, Blade Sharpening, Lathe Tool Maintenance, Grooving

Operational Details

Model Identification

PG-M2

Operational Exclusions

Not intended for R-type cutters or tungsten carbide cutters.
