

Unshielded Twisted Pair Category 5 Cables

Unshielded twisted pair Category 5 cables are available in 25, 50, and 100 pair configurations. These cables are designed for high-speed data transmission and are commonly used in networking applications.

Product Overview

High-Performance Category 5 Networking Cable

These Unshielded Twisted Pair (UTP) Category 5 cables are engineered for high-speed data transmission across a wide range of networking applications. Designed to meet stringent Cat 5 standards, they ensure reliable performance for modern voice, data, and video communications. Their robust construction makes them an ideal choice for complex commercial and industrial network installations.
