

Unshielded Twisted Pair Communication Cable

This unshielded twisted pair cable is designed for indoor applications. The communication cable ensures reliable data transmission and meets industry standards for performance and safety.

Product Overview

Reliable Indoor Communication Solution

This unshielded twisted pair (UTP) communication cable is engineered for high-quality data transmission in indoor environments. Featuring two pairs of color-coded wires, it allows for easy identification and streamlined installation. Designed to meet industry standards for performance and safety, it provides a dependable connection for various professional communication needs.

Technical Specifications

Configuration

2 Pairs

Pairs

Model Designations

SC6802, SC6802-ZS

Cable Type

Unshielded Twisted Pair (UTP)

Design & Construction

Insulation Features

- Color-coded for easy identification
- Designed for indoor applications
- Optimized for data transmission

Compliance & Safety
