

Unshielded Twisted Pair Communication Cable

This unshielded twisted pair cable is designed for data transmission. It features multiple twisted pairs of insulated copper wires enclosed in a protective outer jacket, suitable for Ethernet networks.

Product Overview

High-Performance Communication Cable

This unshielded twisted pair (UTP) cable is engineered for reliable data transmission in professional communication systems. It features multiple twisted pairs of insulated copper wires, providing a robust solution for Ethernet networks and various high-speed data environments. The protective outer jacket ensures durability while maintaining the flexibility required for complex installations.

Technical Specifications

Model Reference

SC6501

Cable Type

Unshielded Twisted Pair (UTP)

Conductor Material

Insulated Copper

Application & Usage

Primary Applications

- Ethernet Networks
- Data Transmission Systems
- Communication Infrastructure

Construction Details

Construction Features

Twisted Pairs, Insulated Wires, Protective Outer Jacket
