

Unshielded Twisted Pair UTP Cable

Unshielded twisted pair (UTP) cable designed for data transmission in networking applications. Features multiple twisted pairs of solid copper conductors, color-coded for easy identification and termination.

Product Overview

Professional UTP Networking Cable

This high-performance unshielded twisted pair (UTP) cable is engineered for robust data transmission in diverse networking environments. Featuring solid copper conductors and color-coded identification, it ensures reliable signal integrity for Ethernet, Fast Ethernet, and Gigabit Ethernet applications. Protected by a durable PVC jacket, this cable is designed to withstand environmental factors while maintaining high-speed data transfer rates.

Technical Specifications

Cable Type	Unshielded Twisted Pair (UTP) Category 5
Available Pair Configurations	25 Pair, 50 Pair, 100 Pair

Construction & Materials

Conductor Material	Solid Copper
Outer Jacket	Durable PVC

Performance

Supported Networks

- Ethernet
- Fast Ethernet
- Gigabit Ethernet

Compliance

Industry Standards

Electrical Performance Compliant • Safety Compliant
