

UP154 Engine Assembly

This high-performance engine assembly is engineered for optimal power output and fuel efficiency. Its compact design, easy starting, and low maintenance requirements provide a dependable power source for diverse applications.

Overview

UP154 Performance Engine

The UP154 is a robust 4-stroke, air-cooled OHV gasoline engine designed to deliver consistent, stable power output for professional applications. Engineered for efficiency and reliability, it features a user-friendly recoil start system and a focus on low noise and vibration levels. This engine provides an optimal power-to-fuel ratio, making it a dependable choice for generators and small power equipment.

Performance

Key Performance Indicators

2.4 Hp

Max Power

4.3 N.m

Max Torque

72 dB

Noise Level

Technical Specifications

Engine Configuration

Parameter	Value
Engine Type	4-Stroke, Air-cooled, OHV
Displacement	87 cc
Bore x Stroke	54x38 mm
Fuel Consumption	230 g/hp.h
Ignition System	Transistorized Magneto

Fluids and Capacity

1.6L Fuel Tank, 0.4L Oil Volume, SAE 10W/30

Logistics

Container Load

- 20ft container: 594 units
- 40ft container: 1200 units
