

Upright Bagless Vacuum Cleaner with HEPA Filter

This vacuum cleaner includes a HEPA filter for efficient air purification and is bagless for easy maintenance. Its body turning function allows for flexible cleaning, while the cyclone style ensures powerful suction.

Product Overview

High-Efficiency Upright Cleaning

The BST-819 upright vacuum cleaner is engineered for professional-grade cleaning efficiency, featuring advanced cyclone technology for powerful, consistent suction. Equipped with a high-performance HEPA filter, it ensures optimal air purification by trapping fine dust and allergens. Its versatile design includes a collapsible handle for space-saving storage, a body-turning function for maximum maneuverability, and a convenient retractable cord system.

Key Features

Core Functionalities

- Cyclone style suction technology
- Airflow control handle
- Block fall-safe function
- Body turning design for maneuverability
- Collapsible handle for compact storage
- Retractable power cord

Technical Specs
