

Urban Commuter Scooter

This gas scooter is designed for urban transportation and short commutes. It features a single-cylinder engine and an exhaust system.

Overview

Designed for Urban Mobility

The Urban Commuter Scooter is a practical and stylish solution for daily city transportation. Featuring a classic step-through frame and efficient single-cylinder engine, it offers a reliable way to navigate urban environments. With integrated safety features like front and rear lighting and convenient utility additions such as a luggage rack, it is built to handle short commutes with ease.
