

# Urban Commuter Scooter with Step-Through Frame

This scooter is designed for urban commuting and short trips. It features a step-through frame, a front fairing with dual headlights, and rearview mirrors.

## Overview

### Urban Commuter Scooter

This versatile scooter-style motorcycle is engineered for efficient urban and short-distance transportation. Featuring a convenient step-through frame design, it offers ease of access and maneuverability for daily commuting. The rugged construction, including knobby tires, ensures reliable performance across varied terrain, while the integrated front fairing and dual headlights provide enhanced visibility and style.
