

# Urban Light Rail Vehicle

This light rail vehicle is designed for urban transportation. It features a streamlined exterior, multiple passenger doors, and an overhead catenary system.

## Overview

### Modern Urban Light Rail Vehicle

This modern light rail vehicle is engineered specifically for efficient urban transportation, offering a streamlined design that integrates seamlessly into city landscapes. Featuring a sophisticated light gray and teal exterior, it is equipped with multiple passenger doors and expansive windows to ensure optimal visibility and passenger comfort. Designed for reliability, the system utilizes an overhead catenary power supply, making it an ideal solution for city tram or metro infrastructure applications.

## Technical Specifications

Power System	Overhead Catenary System
Applications	City Tram, Metro
