

Urban Multi-Purpose Vehicle for Cargo and Passengers

This compact multi-purpose vehicle is designed for urban transport and light commercial use. It features a boxy design with a high roof to maximize cargo space and passenger comfort.

Product Overview

Urban Transport Solution

The TM6390 HalfLoaf is a versatile multi-purpose vehicle meticulously engineered for both urban cargo transport and passenger travel. Its distinct boxy architecture optimizes interior volume, providing a high roofline that ensures superior cargo capacity and enhanced passenger headroom. Designed for reliability in demanding commercial or personal settings, this vehicle combines efficiency with a robust chassis to meet the needs of modern logistics and transit.

Design and Utility

Primary Applications	Urban Transport, Light Commercial, Delivery Services, Family Transportation
Body Configuration	Boxy high-roof design

Performance

Key Performance Attributes

- Fuel-efficient engine
- Durable chassis construction
- Optimized for urban maneuverability
