

USB A to B Printer Cable

This USB A to B cable connects peripherals to a computer. It is suitable for printers, scanners, and external storage devices.

Product Overview

Versatile Data Connectivity

This USB A to B printer cable provides a reliable connection between computers and a wide array of peripherals. Designed for robust data transmission, it supports various devices including printers, scanners, keyboards, and digital cameras. Its shielded construction ensures minimal electromagnetic interference, making it an essential component for office and home computing environments.

Technical Details

Supported Peripherals

- Printers
- Scanners
- Digital Cameras
- External CD-ROM drives
- Keyboards and Mice
- Modems
- MP3 Players

Design Features

Shielded Connectors • EMI Protection • Desktop Optimized

Connector Types

USB Type-A, USB Type-B
