

USB Desktop Webcam with LED

This PC camera is designed for desktop or laptop use. It features a compact design with a clip for easy attachment to monitors or laptop screens, a manual focus lens, built-in LEDs, and USB connectivity.

Overview

Professional Desktop Webcam

This versatile USB desktop webcam is engineered for high-quality video conferencing, online streaming, and general video recording. Featuring a compact, clip-on design, it attaches effortlessly to monitors or laptop screens for optimal positioning. With integrated LED lighting for enhanced low-light performance and manual focus adjustment, this camera ensures clear, reliable visuals in any professional environment.
