

USB PD and 2.4A Travel Charger

This travel charger features a USB Power Delivery (PD) port and a standard 2.4A USB-A port. Its compact design allows for efficient and rapid charging of various electronic devices, including smartphones and tablets.

Product Overview

Compact and Efficient Travel Charging

This versatile wall charger is designed for modern travelers, offering a combination of USB Power Delivery and a standard 2.4A output. Engineered with an intelligent IC controller, it ensures fast, efficient charging while automatically detecting battery saturation to prevent overcharging. Its lightweight and stylish design makes it the perfect companion for keeping your mobile devices powered on the go.

Technical Specifications

Charging Performance

2.4 A USB-A Output	3400 mAh Max Capacity Support
------------------------------	---

Compatibility

Lithium Ion Phones, Smartphones, Tablets

Safety and Quality

Safety Standards

- Intelligent IC charging control
- Automatic overcharge protection
- Constant current and voltage regulation
- Rigorous aging and testing procedures
- International safety standards compliant

Design

Design Features

Lightweight • Compact • Travel-Friendly • High-Grade Appearance
