

USB Personal Air Purifier

This personal air purifier is powered by USB. It is designed for localized air purification, removing dust, pollen, and other airborne particles to improve air quality in small spaces.

Product Overview

Compact Air Purification

The YQ-600 USB Air Purifier is a highly portable device engineered for personalized air quality improvement. It effectively traps airborne pollutants such as dust and pollen, creating a healthier micro-environment. Designed for versatility, this compact unit is ideal for office workstations, vehicle interiors, or small living spaces.
